JESSER SUSI

Wadestown, Wellington | susi.jesser@gmail.com | 021 156 1814 | LinkedIn | GitHub

TECHNICAL SKILLS

- C# .Net, ASP.NET MVC, WPF
- JavaScript, jQuery, HTML, CSS, Bootstrap, React.js
- Microsoft SQL Server

- Web Services, REST APIs
- Visual Studio, Visual Studio Code, TFS, JIRA, Git
- Agile Scrum Development

PERSONAL PROJECTS

I have learned new technologies/frameworks that I used for development, one of which is React.js to develop apps that consume API from OpenWeatherMaps and Spotify. The other one is Xamarin and built my own mobile dictionary. Also, I implemented and worked on some applications that provide OAuth from different sources.

GloomBlue

React.js + Bootstrap (Hosted on Netlify)

- A weather app that displays the information based on the inputted location which consumes data from OpenWeatherMap and uses JSON file to convert country code based on 2-digit codes (ISO 3166-1) into their full name. Map can also be displayed (provided by react-leaflet) base on the geo coordinates.

Artist's Top Tracks | Spotify

React.js + Bootstrap (Hosted on Netlify)

- An app that lists the artist's top tracks. It displays the album cover and some info upon clicking on the list of songs. This utilizes OAuth to authenticate Spotify and use APIs to search for artist ID, albums, songs, etc.

WORK EXPERIENCE

Software Engineer   Nov 2014 – Apr 2018

Infor – Manila, Philippines

- Migrated codebase of an existing enterprise application from WinForms to ASP.NET MVC, leveraging Web Services and XML while working with Australian counterparts
- Conducted unit testing and regression testing for functionality and quality control
- Reviewed deliverables with system stakeholders
- Developed and presented web form prototypes for the organisation
- Built and deployed server for QA testing
- Collated and reported feedback on UI bugs to Infor design team
- Created and presented weekly data presentations to team
- Mentored new team member to familiarise herself about the team's development processes

Environment

- Microsoft Technologies (C# .Net, SQL Server and TFS Build and Deploy), JavaScript and jQuery

Key Achievements

- Developed a dynamic control (5 different controls based on a variable) that was used for four forms
- Developed prototypes that were well-received by clients
- Assigned as point person for server deployment and implemented a systematic approach

Programmer   Feb 2013 – Nov 2014

Londa Online Technologies, Inc. – Manila, Philippines

- Developed form-based software trading application
- Designed UI using WPF and DevExpress
- Researched and analysed formula to be used in foreign exchange computation
- Coordinated development issues to Russian counterpart
- Performed manual testing for functionality and quality control
- Debugged, analysed, and fixed issues found on the software application

Environment

- C# .Net, Windows Foundation Presentation (WPF), DevExpress, TortoiseSVN, JIRA

Junior Software Developer   Nov 2011 – Oct 2012
Private Scandinavian Sparkasse – Manila, Philippines
- Developed client and server software applications for a foreign exchange company
- Researched technologies on how client and server applications can communicate
- Researched and implemented ways to address application's performance issue
- Performed regression testing for functionality and quality control
- Debugged, analysed, and identified bottlenecks in application performance

Environment
- Microsoft Technologies (C# .Net, Visual C++, SQL Server), TortoiseSVN

Key Achievements
- Offered a permanent job after completing the internship program for three months

New Zealand Work Experience

Seafood Assistant   Dec 2018 – Apr 2019
PAK'nSAVE, Wellington
- Provided efficient, friendly, and professional service to all customers, making the experience positive
- Contributed to department's productivity while working in a multicultural team environment
- Trained new staffs

Room Attendant   Aug 2018
Ibis Hotel, Wellington
- Provided efficient, friendly, and professional service to all guests, making all guests experience positive
- Worked in a multicultural team environment

Education & Training

Bachelor of Science in Information Technology (Level 7, NZQA Assessed)   Apr 2012
Polytechnic University of the Philippines

Work Connect: Culture in the NZ Workplace Session   Jun 2018
44 The Terrace, Wellington

Skills & Attributes

Problem Solving
- Resolved unresponsive trading platform software application by using multithreading
- Analysed and came up with new formula for computing foreign exchange trading transaction
- Implemented scheduling of deployment for QA team which improved the development process by 5%

Teamwork
- Collaborated with peers to influence software development processes improvements
- Mentored new team members about the team development processes
- Initiated and led team building activities to promote camaraderie amongst each other

Personal Attributes
- Works well in team-led software development and autonomously
- Learns quickly and thrives in fast-paced environment
- Committed to continuous improvement and learning
- Strong communication skills and passion for innovation
- Self-driven, motivated and enjoys building something that involves problem-solving and analysis
